

Greater strength, mold resistance and energy efficiency all wrapped up in one.

Gorilla Wrap™ is a non-perforated, non-woven polymeric material that creates decreased air infiltration resulting in increased energy efficiency and maximized moisture management.

**Gorilla Wrap™ is strong.**

- It reduces builder concern with a tear strength that is 300 percent higher than the leading housewrap
- Product is translucent, enabling contractors to see studs, nails and windows — therefore improving installation time

**Gorilla Wrap™ is energy efficient.**

- This non-perforated, non-woven polymeric housewrap creates outstanding air resistance that reduces drafts — increasing comfort and protecting the home from energy loss

**Gorilla Wrap™ is mold resistant.**

- Minimizes water infiltration thus keeping wood sheathing drier and reduces the potential for rot and degradation within the wall cavity

For more information call 1.800.251.1660, ext. 3772

Gorilla Wrap is a non-perforated wrap that offers greater strength, water resistance and energy efficiency for greater peace of mind.
